

Billing Services

Brokers and Employers

Billing participants is time-consuming. *Set it and forget it.*

Offering great benefits can sometimes result in challenges to collect premiums directly from participants. **Billing Services** reduces workload and gets billing done.

Easily Collect Recurring Premiums from Participants

Employers can easily collect premiums outside of payroll deductions with Billing Services. They provide us with their recurring premium amounts for the year and the list of employees to bill—**we do the rest**. What can be a heavily repetitive task is reduced to adding and removing employees and providing annual premium updates.

Retiree Billing

Employers offering retirees the option to continue their benefits use Billing Services to collect payments. We send a bill to the participant, collect their payment, and remit the balance to the employer. The participant can pay online or mail their payment. We send late notices if the payment isn't received and the employer can choose to set up a payment grace period.

Dedicated Client Service Consultant

Have COBRASecureSM, EBC HRASM, or The BESTflexSM Plan? We assign a dedicated Client Service Consultant to every client—for all of their products. So employers work with a team member who understands all of their products and provides seamless service. Add Billing Services to further streamline your benefit offerings.
